WORK EXPERIENCE

Lead Ecommerce Developer / React Native Developer

Tillys - Oct 2020 to Present

- Develop and maintain existing core codebases
- Troubleshoot and resolve technical issues
- Develop using React Native to build our Tilly's ecommerce native apps
- Implement and maintain features on Tilly's Android/iOS native app
- Work closely with third party teams to integrate their services

Lead Ecommerce Developer

Red Van Workshop - Oct 2020 to Dec 2022

- Use SFCC (Salesforce Commerce Cloud), Javascript, Vue.js, and Nuxt.js in coding projects across web platforms.
- Code order tracking systems from scratch to integrate with client's backend ERP systems to update granular progress on orders containing complex products such as custom built guitars.
- Implement complex custom functionality on the SFCC platform, like product configurators, single page checkout, subscription models, loyalty programs.
- Develop and troubleshoot SFCC integrations, such as tax providers, payment processors, loyalty programs, and order management systems
- Develop unit, functional, and integration tested LINK cartridges for major SFCC vendors
- Plan SFCC builds and projects, authoring technical specifications
- Receive business objectives and author tickets for developers to meet these objectives

Solutions Architect

Crown Awards - White Plains, NY - Sep 2017 to Dec 2020

- Gathered business and technical requirements from retail partners and authored technical and functional specification documents
- Created system architecture diagrams and designed data flows
- Design and implement complex applications such as image builder services for producing and serving images at runtime, product personalization engines for trophies, acrylics and plaques, and interfaces for importing orders through external platforms such as Amazon.
- Provided directions to developers for implementation of custom functionality and integration

Ecommerce Web Developer

Trade Global - WestChester, OH - April 2016 to April 2017

- Collaborated with client and team members as we successfully migrated 5 brand sites and dozens of locales to Salesforce Commerce Cloud in one year

- Integrated external services such as recommendations, reviews engines, and loyalty programs
- Conversions of SiteGenesis pipelines to controllers
- Develop in house LINK cartridge for global shipping/logistics services

EDUCATION
AAS Information Technology - Lincoln College of Technology
